Formulation of conclusions		X				
Work with scientific literature (quotations, norms)		X				
Clarity and professionalism of expression in the work		X				
The level of editing images and tables.			X			

Other comments:

The aim of the Master Thesis was to describe the Cyberspace with its advantage and disadvantage, depending on the information society. Part of this work was focused into information society, problems with cybercrime and cyberbullying and cyberspace in general.

Mr. Philip Bruce-Quaye elaborated seriously wide and actual topic. Whole work was built on good theoretical background of the author and the text is clear and on commensurate level.

The work is divided into four chapters, started with introduction and literature review followed methodology, results and discussions. Finally, the last chapter is dedicated conclusions and recommendations. Master thesis has 87 pages.

Contents of the work correspond to the aim in the dissertation assignment. Within chapter four Mr. Philip Bruce-Quaye made comparison of the cyberspace both, Ghana and Czech Republic based on public data.

Scope of the literature used in the work is sufficient. As a whole, this work is in accordance with the requirements for the Master Thesis. Mr. Philip Bruce-Quaye worked at the Thesis for a long time and steadily. He respected and incorporated into the text most of the supervisor's comments.

Question: I have no questions.

I suggest the grade: excellent minus
