Dissertation defense recommendations

PhD student Ing. Abdeloualid Rouag, during his PhD studies at the Faculty of Economics and Administration of the University of Pardubice, completed his individual study plan. He studied in first two years in the full-time form of study, which included:

- he participated in the teaching of full-time students in bachelor's study program, he participated in the lectures and seminars in the Public Economics,
- he participated in research activities within the framework of the GAČR research project (supervisor was the main researcher of this project);
- he collaborated with other academic staff of our Institute to prepare scientific publications, elaborated several conference papers and participated in scientific conferences.

After two years, he decided to move into a part-time form of ph.d. study. He started to work in a big reputable foreign firm, and his research and teaching activities were significantly reduced. On June, 26, 2016 he passed the state doctoral exam and started to prepare the final ph.d. thesis in selected topic. In June, 2018 he fulfilled all the necessary conditions for the dissertation defence, which is the last duty for completion of his PhD studies.

I am glad that as a supervisor can say that Ph.D. student Ing. Rouag

- has done a very good dissertation thesis titled *The Transformation of the Public Sector and Its Financing*, which solves a very interesting and necessary topic. The issue was dealt with by the so-called MENA countries, countries whose economies depend on revenues from oil extraction and sale. The results of his dissertation work can be used in the Algerian economy, which is certainly a significant contribution of his dissertation thesis;
- clearly demonstrated his ability of independent scientific work. He is able to take advantage of all the knowledge and skills (he has acquired during his studies) to present of new scientific knowledge and the results of his scientific analyses. This is evidenced by his publishing activity. He participated in co-authorship on the preparation and publication of one publication in journal with an impact factor;
- in the first two years at the University worked at the Institute of Economic Sciences, he demonstrated his ability to work in a team, cooperation with others. These skills he proves in his current profession, where he leads a team of his co-workers.

PhD student Ing. Abdeloualid Rouag is a fully developed personality. That's why I recommend him proudly to **defend his dissertation thesis and, after his successful defence, to award him the title philosophiæ doctor (Ph.D.).**
