

## Supervisors opinion

**Student:** Ing. Ebo Tawiah Quartey

**Name of dissertation:** Plastic Waste Management in Ghana: A Theoretical Framework for Sachet Water Waste Recovery Scheme through Extended Producer Responsibility

Students came from the University of Life Sciences Prague and studied in full-time study programme Chemical and Process Engineering, Study Specialization in Environmental Engineering.

During the study he approached solving tasks very seriously and worked separately. He became involved in the research project MoE no. SP / 4i2 / 60/07 "Indicators for assessing and modeling the links between environment, economy and social context" and especially "TAČR TD 010,130 Regionalization economic performance in relation to the quality of the environment".

His approach to solving Ing. Ebo Tawiah Quartey has demonstrated the ability of systematic scientific work. Acquired the necessary methodological procedures and results were presented appropriately presented in the dissertation and publishing. Alone or jointly published in professional and scientific journals and the results of their work were presented at conferences.

In the educational sphere helped with exercise subject of Environmental Economics and Management for foreign students, attended the training e-learning for Joint degree (Certificate received).

Ing. Ebo Tawiah Quartey presents work that deals with the search for efficient collection and sorting of municipal waste. Target sees the extended producer responsibility and eco-efficiency.

The work meets the requirements for dissertation and therefore **I recommend to the defense.**
