Formal layout of thesis		x		
Stylistic level		x		
Analysis, mathematical methods, comparisons	high	average	low	not available
			x	
Applicability of proposals to problem solution	high	average	low	not available
		x		
Relevance of appendices (tables, graphs, figures)	high	average	low	not available
		x		

Other comments

The clarity and professionalism of expression in thesis is all right. There are some formal mistakes such as bad translation of abstract in Czech language. Author worked well with citation and with references. Chapter 3 is named Implementation of ERP system in real companies is what should be the main contribution of thesis. Author used such one company and author could use some more advanced methods or advanced software tools for analysis. Outputs are only descriptive. The objectives of the work were largely fulfilled and this work is in accordance with the requirements for the Master Thesis.

Question:

- 1) Can you use your recommendations on different company which is not multinational or company in different country?

I suggest the grade:

Very good minus

Ing. Jan Panuš, Ph.D.
