Other Comments on the Thesis

The aim of the thesis was to find out factors that influence the success of smart city initiatives, based on the literature review. Submitted thesis provides only a very brief review of factors that influence success of smart city initiatives. Although the student fulfilled requirements on bachelor's thesis, the level of literature review should be much deeper. More literature resources would significantly improve quality of the thesis. The level of English with many mistakes is another problem of the thesis, which makes reading difficult.
