Other Comments on the Thesis

The aim of the thesis was to describe the implementation of a global security project using PMI methodology. The student fulfilled requirements on master's thesis but the level of accomplishment is low. Comments on the thesis consider two factors; formal and content. Formal comments include mainly the level of language and very poor processing of literature. Some sources are mentioned in the text without being in references and vice versa. From the point of view of the content, the thesis brings proof of the implementation of PMI methodology, but the analysis could be deeper. For the thesis results to be applicable in practice, they would have to be better explained, e.g. table 6 use many abbreviations without the explanation.
