## REFERENCE LETTER

### Opinion of the Supervisor

Mr. Amir Shaaban Farag Mohamed Nawar had started his PhD at our department under supervision of Prof. Dr. Karel Vytrás. After a sad passing away of Prof. Vytrás, I took up the care about the dissertant.

Throughout the years of his studies, Amir Shaaban Farag had proved himself to be a talented, conscientious, and hardworking person, having been able to complete the required objectives: prescribed examinations, research stay in abroad and scientific publications, when his valuable experimental results could eventually be published in good international journals. And all this could be accomplished despite difficult time in the second half of his studies associated with the global pandemic of coronavirus.

Based on the above-stated, I heartily recommend his dissertation thesis to the final defence.

Prof. Ing. **Ivan Švancara**, Dr.,  
Supervisor at the Department of Analytical Chemistry

### Opinion of the Training Institution

Is in full accordance with recommendation by the supervisor.

Prof. Ing. **Karel Ventura**, CSc.,  
Head of Department of Analytical Chemistry
